

PROFESSIONAL TEACHERS

All of SAW's teachers are working cartoonists, illustrators, or artists dedicated to helping students tell their stories. As fellow storytellers, they understand the highs and lows of the creative journey and can share their experience with students.

ONLINE COURSES

Whether you've made over a dozen comics, or you haven't drawn in 10 years, SAW's Online Classes will teach you new skills and challenge your storytelling abilities.

WEEK-LONG WORKSHOPS

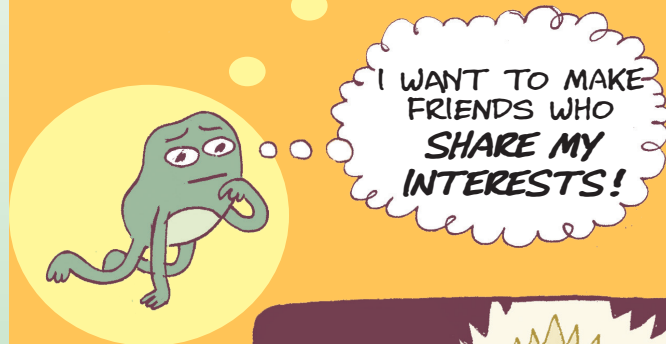

Get creative focus at SAW's Week-Long Workshops. SAW's faculty can help you start a comics project on the right foot—or get a wayward project back on track.

A PLACE FOR TRANSFORMATION...

WHAT IS SAW?

In SAW's Year-Long Program, you'll work with professional cartoonists and your peers to tell your stories better.

Your teachers will mentor you, giving you personalized assignments and feedback in addition to the core curriculum. The Year-Long Program covers both technical—inking, figure drawing, how to format comics for print—as well as exercises to stretch your storytelling abilities.

We designed this program to ensure that comics remains an accessible, community-centered

medium, and to offer a personalized, affordable alternative to MFA and BFA sequential art programs.

STUDENTS TALK ABOUT SAW

SAW was everything I needed, in the right place at the right time. I learned so much in such a short amount of time. I learned from some of the most dedicated, compassionate people I've ever met, with 9 wonderful classmates. If you're thinking about going there, feel free to talk to me.

-Miranda Harmon

I think back on my time at SAW almost every day, the amount I got out of my year there is amazing... I'd probably have quit comics without Tom and Justine's guidance. I think a lot about how much I'd get out of taking the full-year program again.

-Bjorn Miner

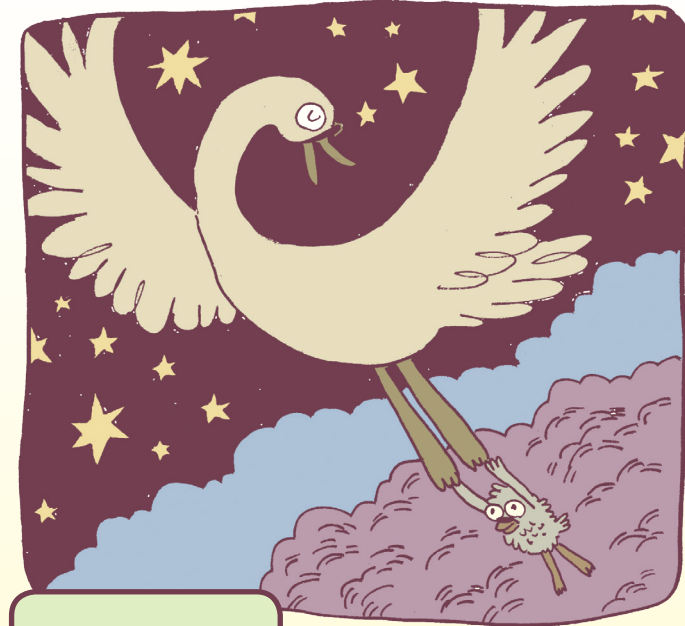

SAW has been the single best decision I've made for my creative career. It is run by some of the most generous, accepting and insightful people I've ever had the privilege of knowing.

-Michelle Tabares

I travelled ten thousand miles from India to study at SAW. I've lived in five countries before, and I can tell you there is something special about the people at SAW that is rare anywhere in the world. My experience here has been invaluable. I have learnt so much about cartooning, art, nature and life.
